Subject Index

Abortion, differences between women who have and do not have abortion, 296
Accident and emergency departments attendance, classification, 134
Accident prevention, children, role of the teacher, 23
Accident rates, childhood, differences between high and low rate areas, 439
AIDS, employers' policies, 101
Amblyopia, social deprivation and age at presentation, 348
Antenatal care, relationship with obstetric risk, 60
Avoidable mortality, guide to the performance of health services, 321

Birth outcome, relationship with consanguinity, 423
Breast feeding, determinants, Salisbury and Durham, 291
Breast screening, uptake by Asian women, 179

Canada, communicable disease control, 132
Cancer registry, treatment data, comparability, 331
Cancer risk, false allegation, 381
Caribbean, health care, 263
Cataract surgery, treatment, criteria used, 393
Cervical cancer, accuracy of cancer registration, 50
Cervical cancer, standardized mortality, 16
Chest pain, investigation, criteria for purchasing coronary angiography, 399
Chronic disease, a taxonomy of shared care, 447
Colorectal cancer, relationship with material deprivation, small area analysis, 429
Communicable disease control, Canada, 132
Communicable disease control, England, an American perspective, 415
Communicable disease review, 105, 235, 357, 478
Consanguinity, relationship with birth outcome, 423
Coronary angiography, purchasing criteria, investigation of chest pain, 399

Day surgery, general practitioner attitudes, 318

Echovirus infection, associated with outdoor swimming pool, 145
Epidemiology, public and media interpretations, 270
Escherichia coli O157, outbreak in psychogeriatric wards, 11
Exercise, attitudes of adolescents, 186

General practice, data for psychiatric service contracts, 87
General practice, randomized trial of immediate discharge of surgical patients, 455
General practitioners, attitudes to day surgery, 318
General practitioners, fundholding, future trends, 36
Growth, abnormal, screening, 201

Health, social patterning, role of social sciences, 53
Health and international debt, report of conference, 233
Health care, Caribbean, review, 263
Health care, commissioning for people with learning disabilities, 279
Health care needs, Singapore, 149
Health care services, evaluation by avoidable mortality, 321
Health care system, Latvia, 97
Health care targets, primary care and environmental aspects, 195
Health education in schools, 219
Health hazards, reproduction, role of pesticide, 141
Hepatitis B vaccination, uptake by health workers, 354
Hepatitis prevalence in immigrants from NE Africa, 71
HIV, employers' policies, survey, 101
Hospital admissions, classification as appropriate or inappropriate, 288
Hospital admissions, patients admitted in districts other than their own, 159
Hospital at Home scheme, evaluation for patients with fractured neck of femur, 205

Immunization, uptake and parental perceptions, orthodox Jewish community, 314
Infertility, prevalence, needs assessment and purchasing, 29
Ischaemic heart disease, attaining *The health of the nation* targets, 406
Italy, hepatitis prevalence in immigrants from NE Africa, 71

Latvia, health care system, 97
Legionnaires' disease, investigation and control of the outbreak, 341

Medical education, undergraduate, role of public health, 389

National Breast Screening Programme, 79
National Health Service, effect of internal market, 256

Obstetric risk, factor for antenatal care, 60

Pesticide, reproductive health hazards, public health policy, 141
Prostatectomy, postal survey evaluation, 275
Psychiatric disorders, junior school children, relationship with stressful life events, 471
Psychiatry, child and adolescent, regional units, 305
Public health medicine training, Leicestershire Senior House Officer scheme, 310
Public health research, future trends, 4

Radon, literature review, 465
Rheumatology, evaluation of Ambulatory Visit Groups, 41

Senior House Officer scheme, training in public health medicine, 310
Singapore, health care needs, 149
Skin cancer, prevention and monitoring trends, 225
Small area analysis, material deprivation and colorectal cancer, 429
Smoking, attitudes and behaviour among adolescents, 165
Smoking, prevalence among 15–16-year-olds, 172
Stroke, prevalence and need for care, 93

Visual disability, elderly people, assessment of needs and examining services, 211
